If you need urgent assistance during this time please call 111

Training Practice

We are a training practice, which means that doctors who intend to make their career in General Practice are attached to the practice for six months at a time. These doctors are fully qualified, often with hospital experience. A requirement of their training is the video recording of consultations. Only consultations with the trainee doctors will be recorded and consent is always sought at the time of the appointment. Our current trainee doctors are:

Dr Mila Gunasegaran
Dr Sarah McVey
Dr Sophie Clark
